Lagos, Nigeria • +234-806-788-1239 • mayakianthony@yahoo.com • [Linkedin](#). [Github](#)

A software developer with an eye for problem-solving. Committed to getting the job done effectively and an asset to any software development team.

## PROFESSIONAL EXPERIENCE

---

**Shecluded**, Lekki, Lagos, Nigeria

February, 2023 - April, 2023

### Full-Stack Developer (contract)

- Assisted in developing and implementing systems architecture designs, patterns, and approaches.
- Developed web applications and components using React, including software testing practices.
- Wrote structured, tested, readable, and maintainable code.
- Planned, wrote, and debugged web applications software with complete accuracy.
- Worked closely with the app development team including project and product manager, developers and QA to determine problems, testing methods, and best practices.

**Decagon**, Lagos, Nigeria

May, 2022 – January, 2023

### Software Engineer

- Developed scalable web-based user interfaces and components using ReactJs, NodeJs, JavaScript, and TypeScript.
- Part of a team of 5 developers that developed a fintech App where a user can sell their surplus airtime into cash.
- Outlined high-volume, high-scale web front ends for assets requiring responsive designs.
- Collaborated with a team of Engineers, developing, architecting, and implementing backend APIs for transportation systems, health, and fintech
- Implemented continuous delivery using 100% declarative infrastructure and automated deployment.
- Assisted in developing server-based NodeJs software by providing inputs and insights, acquiring a 15% increase in the quality of overall work.
- Part of a team of 5 developers that developed a Logistic app that connects users to dispatch riders available to move goods from one location to another.
- Ensured the quality of product through code reviews and high level of unit and functional test coverage.
- Handled database management system with SQL like mySQL, Postgres ,and NoSQL database like MongoDB

**M15 Innovation**, Lagos, Nigeria

February 2020 – May 2022

### Software Engineer

- Consistently applied best practices for writing clean, secure, readable, and scalable code.

- Designed and built Restful APIs to maintain operations continuity and productivity.
- Part of a team of 4 developers that built a website that recycles waste, with javascript and bootstrap.
- Attends daily scrum meetings, and keeps up-to-date on best practices for javascript frameworks and techniques.
- Validated client interface requirements and assessed impact of needs on available systems.
- Analyzed and dealt with a significant process bottleneck that boosted coding efficiency by 35% when resolved.

## EDUCATION

**Federal University of Agriculture, Makurdi**

March, 2018

B.Eng Mechanical Engineering

## SKILLS

- |                                       |                     |             |                |
|---------------------------------------|---------------------|-------------|----------------|
| • version control with Git and Github | • MySQL             | • Jira      | • Kubernete    |
| • Project Management                  | • PostgreSQL        | • Docker    | • AWS          |
| • Leadership Skills                   | • MongoDB           | • Swagger   | • Material UI  |
| • REST API                            | • Express Framework | • GraphQL   | • Tailwind     |
| • NodeJs                              | • Agile/Scrum       | • CI/CD     | • Microservice |
| • TypeScript                          | • HTML/ CSS         | • Bootstrap | • Firebase     |
| • React                               | • JavaScript        | • Unit Test | • Redux        |
|                                       | • Postman           | • SASS      |                |

## PROJECTS

### • **AIRTIME2CASH APP:**

Is an Airtime to cash application that permits users to sell their surplus airtime to cash. It features a wallet which holds the funds users receive in return for sold airtime, and allows for withdrawal of those funds into users designated account.

**Technologies Used :** Express, NodeJs, TypeScript, JavaScript, React, Sequelize ORM, Postgres, ReactJs, Netlify, Swagger, Docker, Netlify and Heroku..

[Link](#)

### • **MUSIC BOX:**

A music streaming application where users can search for their favorite songs and listen to them. The user can manage their experience by customizing the app to their desire.

**Technologies Used :** React, JavaScript, TypeScript, NodeJs, Express , and MongoDB.

[Link](#)

### • **HOTEL APPLICATION:**

An online web application that includes various hotels booking prices and other information. It includes all basic CRUD operations as well secure authorization and authentication of users and web pages.

**Technologies Used:** TypeScript, NodeJs, Express, Sequelize ORM, SQLite, Bootstrap, EJS, Docker, Railway.

[Link](#)

- **OMNI FOOD:**

A website for busy and working class people to order meals, who do not have time to prepare home made meals.

**Technologies Used:** Html, css, Vanilla Javascript, Media queries.
